

GTE BIBLIOGRAPHY

Introductory Remarks

In 1984, the National Academy of Sciences recommended initiation of a Global Tropospheric Chemistry Program (GTCP) in recognition of the central role of tropospheric chemistry in global change. Envisioned as the U.S. national component of an ultimately international research effort, GTCP calls for the systematic study, supported by numerical modeling, of (1) biological sources of atmospheric chemicals; (2) global distributions and long-range transport of chemical species; and (3) reactions in the troposphere that lead to the conversion, redistribution, and removal of atmospheric chemicals.

NASA's contribution to GTCP is the Global Tropospheric Experiment (GTE), which utilizes large, extensively instrumented aircraft-ideal platforms for many atmospheric chemistry experiments as primary research tools. While GTE began primarily as an aircraft-based program supplemented by ground-based measurements, satellite data and model analyses now play an important role. Space Shuttle observations of tropospheric carbon monoxide distributions have helped to plan and direct the course of expeditions over tropical rain forests. Landsat land-surface images have facilitated the extrapolation of regional arctic-tundra measurements into global-scale conclusions. Weather data returned by environmental satellites and model analyses have guided flight planning for research aircraft. Modeling studies also play a critical role in interpreting the mission measurements.

Our knowledge of tropospheric chemistry is limited primarily by measurement capabilities. A first task of GTE was therefore to foster development of the new technologies and experimental techniques required for major research advances. These were evaluated through a series of rigorous intercomparisons called the Chemical Instrumentation Test and Evaluation (CITE) project. The CITE projects were designed to validate the instruments developed for GTE measurements through rigorous intercomparisons under actual field conditions. The three CITE projects completed to date have established the credibility (or, in some cases, the limitations) of powerful new techniques for atmospheric-chemistry measurements; calibrated these new techniques through comparisons with older, proven approaches and provided important new data on trace-gas concentrations in the clean-air regions that served as test sites.

The initial GTE field expeditions-the Atmospheric Boundary Layer Experiment (ABLE) projects-were designed to probe the interactions between the biosphere and the atmosphere. Nowhere is the atmosphere-biosphere interaction more pronounced than within the atmospheric boundary layer-the lowest few hundred meters of the atmosphere. Upward through this layer rise trace gases emitted by the biosphere or produced by industrial activity and combustion. And downward through this layer settle gases and aerosols formed by atmospheric chemistry processes, destined for final deposition on land and sea. Expeditions have now been completed in three ecosystems that are known to exert a major influence over global tropospheric

chemistry and that are being profoundly affected by natural processes, human activities, or both. These are the tropical Atlantic Ocean (ABLE-1), the Brazilian rain forest (ABLE-2), and the northern wetlands (ABLE-3).

Because of the great importance of trace-gas fluxes and their coupling to the global atmosphere, the first extensive GTE field studies were focused on these processes. The southern tropical Atlantic Ocean was the site of one of these large-scale experiments-Transport and Chemistry near the Equator in the Atlantic (TRACE-A). It built upon ABLE-2 results in the Amazon and the research of French, German, and African scientists in Africa to investigate the distribution of atmospheric trace gases over the tropical South Atlantic.

By the early 1990s, progress in instrumentation and the accumulation of additional expedition experience permitted studies of atmospheric chemistry over the Pacific Basin. Over this vast area is found some of the cleanest air on Earth. But around its rim are the most rapidly growing economies in the world. The retention of air quality in this area therefore poses perhaps the ultimate challenge to both science and governments. The projects designed to meet this challenge were collectively called the Pacific Exploratory Missions, or PEM. At present, four missions have been completed: (1) PEM-West A and B, which carried out measurements of the chemical composition of the air leaving the Asian continent, studied its transport to the central Pacific, and evaluated its impact there; (2) PEM-Tropics A, which studied the latitude and altitude dependence of trace-gas and aerosol concentrations over the central Pacific from Peru to New Zealand; and (3) PEM-Tropics B, which focused on the tropical Pacific rain forests and air-sea interactions. These projects have involved most of the Pacific Rim nations. The results have provided profound new insights into chemical changes within clean-air regions around the world.

In early spring 2001, GTE revisited the western Pacific for the Transport and Chemical Evolution over the Pacific (TRACE-P) mission. The two major objectives, (1) chemistry of air emerging from Asia and (2) the chemical evolution of that air as it moves away from Asia, and recent improvements in instrumentation allow deeper understanding of these phenomena than was possible during the PEM West missions.

GTE projects scheduled over the next several years will investigate the global distributions of atmospheric chemical species and the photochemical and transport processes that control large-scale atmospheric chemistry. Table 1 summarizes the GTE missions to date.

The purpose of this bibliography is to provide a single reference for the many publications and presentations (Table 2 indicates the major meetings at which GTE papers were presented) made possible by the GTE Project to date. It is hoped that by expanding visibility for GTE and related missions, increased scientific collaboration will occur. The citations are organized by mission. Inevitably, some citations have been unintentionally overlooked, and the reader is requested to bring these to the attention of the Project Office for inclusion in future bibliography updates.

Known publications and presentations for the Northern Wetlands Study (NOWES) and Southern African Fire-Atmosphere Research Initiative (SAFARI-92) have been included because of the close coordination (objectives, time and space) between these and GTE missions. Related publication and presentation citations are generally from work not sponsored by GTE, but utilize the same instruments as in GTE for another mission or make the same measurements at the same location as GTE or are studies of the same atmospheric phenomena which are a GTE focus. These sections also include citations for GTE work not specific to any one mission.

Table 1. GTE Field Expeditions

Expedition	Date	Location
CITE-1	11/83	Hawaii
CITE-1	4/84	Pacific-CA coast

ABLE-3B Presentations

1. Anderson, B. E., G. L. Gregory, A. S. Bachmeier, E. V. Browell, M. C. Shipham, D. R. Blake, J. D. Bradshaw, S. T. Sandholm, G. W. Sachse, J. E. Collins, Jr., and R. W. Talbot, Low ozone events in the mid-troposphere over Canada during summer 1990. Paper No. A32C-12, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
2. Bachmeier, A. S., M. C. Shipham, E. V. Browell, and J. M. Klassa, Dynamics of stratosphere/troposphere exchange mechanisms observed during ABLE-3B. Paper No. A41A-2, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
3. Bakwin, P. S., J. W. Munger, B. C. Daube, and S. C. Wofsey, Reactive nitrogen oxides at a sub-Arctic site (Schefferville, PQ). Paper No. A41A-11, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
4. Barrick, J. D., J. A. Ritter, C. E. Watson, G. L. Gregory, B. E. Anderson, G. W. Sachse, and J. E. Collins, Jr., Correlation of surface characteristics to in situ airborne boundary layer flux measurements of CO, CH₄, and O₃. Poster No. A42A-2, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
5. Blake, D. R., T. Y. Chen, T. W. Smith, Jr., W. J. Whipple, and F. S. Rowland, Halocarbons and hydrocarbons measured in eastern Canada during ABLE-3B in the summer of 1990. Paper No. A32C-6, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
6. Bradshaw, J. D., S. T. Sandholm, R. W. Talbot, H. B. Singh, D. R. Blake, F. S. Rowland, G. W. Sachse, J. E. Collins, Jr., G. L. Gregory, B. E. Anderson, J. D. W. Barrick, M. C. Shipham, and A. S. Bachmeier, Summertime tropospheric spatial distribution of reactive odd-nitrogen compounds over Canada. Paper No. A32C-7, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
7. Browell, E. V., Recent developments in airborne lidar measurements of ozone, water vapor, and aerosols, OSA Laser Applications to Chemical Analysis, Washington, DC.
8. Browell, E. V., M. A. Fenn, C. F. Butler, G. D. Nowicki, S. D. Mayor, S. A. Kooi, A. F. Carter, W. B. Grant, and NASA ABLE-3B Science Team, Air mass characteristics observed over Canada during ABLE-3B field experiment. Invited Paper No. A32C-2, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
9. Browell, E. V., G. L. Gregory, B. E. Anderson, M. C. Shipham, A. S. Bachmeier, W. B. Grant, J. D. W. Barrick, G. W. Sachse, J. E. Collins, Jr., J. D. Bradshaw, S. T. Sandholm, D. R. Blake, F. S. Rowland, and H. B. Singh, Influence of stratospheric intrusions on chemical composition of troposphere over Canada during the summer of 1990. Paper No. A32C-11, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.

10. Collins, J. E. Jr., G. W. Sachse, G. F. Hill, L. G. Burney, and L. O. Wade, DACOM: Dual gas/dual purpose in-situ instrument for GTE/ABLE-3B expedition. Poster No. A42A-3, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
11. Fan, S.-M., D. J. Jacob, D. L. Mauzerall, J. D. Bradshaw, S. T. Sandholm, D. R. Blake, H. B. Singh, R. W. Talbot, G. L. Gregory, and G. W. Sachse, Photochemistry of reactive nitrogen in the subarctic troposphere in summer 1990: Observations and modeling. Invited Paper No. A52C-8, 1993 AGU Fall Meeting, San Francisco, CA, December 1993.
12. Fitzjarrald, D. R. and K. E. Moore, Surface turbulent exchange and boundary layer climate in a forested region of northern Quebec. Paper No. A41A-5, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
13. Gregory, G. L., B. E. Anderson, M. C. Shipham, E. V. Browell, and R. W. Talbot, Size characteristics of tropospheric aerosols as observed during periods of haze and biomass burning over Canada during the Summer of 1990. Paper No. A32C-4, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
14. Harriss, R. C. and S. C. Wofsey, The Arctic Boundary Layer Expedition (ABLE 3B). Invited Paper No. A32C-1, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
15. Hübler, G., M. P. Buhr, F. C. Fehsenfeld, D. D. Parrish, M. Trainer, B. A. Ridley, J. A. Logan, and S. J. Oltmans, Ozone profiles in the lower troposphere. Paper No. A12E-8, 1996 AGU Fall Meeting, San Francisco, CA, December 1996.
16. Lefer, B. L., K. I. Klemm, O. Klemm, R. W. Talbot, and R. C. Harriss, Observations of phosphoric and oxalic acids in biomass burning plumes over central Canada during ABLE-3B. Poster No. A42A-4, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
17. Martens, C. S., C. A. Kelly, W. Ussler, III, R. J. McCaffrey, J. P. Chanton, and J. Happell, Stable carbon isotope characterization of methane emissions from Canadian sub-Arctic fens, Schefferville, Quebec, Summer 1990. Paper No. A41A-12, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
18. Mauzerall, D. L., D. J. Jacob, S.-M. Fan, J. D. Bradshaw, S. T. Sandholm, D. R. Blake, G. L. Gregory, and G. W. Sachse, An ozone budget for the remote troposphere of eastern Canada. Paper No. A52C-7, 1993 AGU Fall Meeting, San Francisco, CA, December 1993.
19. Moore, K. E. and D. R. Fitzjarrald, Turbulent fluxes at a sub-Arctic fen during ABLE-3B. Paper No. A41A-6, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.

20. Munger, J. W., P. S. Bakwin, B. C. Daube, and S. C. Wofsey, Deposition of nitrogen oxides and ozone to a boreal forest. Paper No. A41A10, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
21. Olson, J. O., J. D. Bradshaw, D. D. Davis, S. T. Sandholm, G. L. Gregory, B. E. Anderson, J. D. W. Barick, G. W. Sachse, and J. E. Collins, Jr., Photostationary state implications of ABLE-3B NO₂/NO measurements. Poster No. A42A-5, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
22. Ritter, J., C. Watson, J. D. W. Barrick, G. W. Sachse, J. E. Collins, Jr., G. L. Gregory, B. E. Anderson, and M. Woerner, Airborne boundary layer measurements of heat, moisture, CH₄, CO, and O₃ fluxes over Canadian boreal forest and northern wetland regions. Paper No. A51B-6, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
23. Sachse, G. W., J. E. Collins, Jr., R. C. Harriss, G. F. Hill, L. O. Wade, L. G. Burney, L. P. Steele, and P. C. Novelli, Methane and carbon monoxide distributions over the ABLE-3B study region. Paper No. A32C-5, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
24. Sandholm, S. T., J. D. Bradshaw, R. W. Talbot, H. B. Singh, G. L. Gregory, B. E. Anderson, J. D. W. Barrick, M. C. Shipham, G. W. Sachse, J. E. Collins, Jr., and A. S. Bachmeier, The odd-nitrogen budget from observations made during ABLE-3B. Paper No. A32C-9, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
25. Shipham, M. C., A. S. Bachmeier, E. V. Browell, and D. R. Cahoon, Meteorological factors influencing the long-range transport of smoke during the ABLE-3B flight series. Paper No. A41A-1, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
26. Singh, H. B., D. O'Hara, D. Herlth, J. D. Bradshaw, S. T. Sandholm, R. W. Talbot, D. R. Blake, and G. L. Gregory, Reactive nitrogen distribution and photochemistry during ABLE-3B. Paper No. A32C-10, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
27. Singh, H. B., D. O'Hara, D. Herlth, M. A. Kanakidou, and G. L. Gregory, Tropospheric measurements of acetone during ABLE-3B: Sources and sinks. Paper No. A41A-3, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
28. Talbot, R. W., J. D. Bradshaw, S. T. Sandholm, and H. B. Singh, Tropospheric NO_y partitioning during summertime over Canada. Paper No. A32C-8, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
29. Ussler, III, W., J. P. Chanton, C. S. Martens, and D. Fitzjarrald, Soil-atmosphere exchange of radon-222 in the Canadian sub-Arctic, Schefferville, Quebec. Paper No. A41A-13, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.

30. Watson, C. E., J. Ritter, J. Barrick, and D. Fitzjarrald, The effects of synoptic-scale features on the vertical structure of the Canadian tundra boundary layer. Paper No. A41A-7, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
31. Wofsey, S. C.(presenter) and the ABLE-3B Science Team, Influence of combustion on the composition of the atmosphere in the Arctic and sub-Arctic regions of North America. Invited Paper No. A32C-3, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
32. Wofsey, S. C., J. W. Munger, P. S. Bakwin, B. C. Daube, and T. R. Moore, Net uptake of CO₂ by northern woodlands. Paper No. A41A-9, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.

NOWES Presentations

1. Anderson, S. M., P. L. Keabian, J. B. McManus, C. E. Kolb, S. M. Fan, P. Bakwin, S. C. Wofsey, and D. R. Fitzjarrald, Measurements of methane fluxes at Lake ABLE by eddy correlation and gradient methods. Paper No. A21A-02, 1989 AGU Spring Meeting, Baltimore, MD, May 1989.
2. Caramori, P. H., P. H. Schuepp, R. L. Desjardins, and J. I. MacPherson, Conditional sampling of convective turbulent structures over the wetlands by aircraft. Paper No. A41A-4, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
3. Crill, P., Seasonal patterns of methane uptake and carbon dioxide release from a temperate woodland soil. Poster No. A42A-15, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
4. Dacey, J., R. Protz, and W. Glooschenko, Dimethylsulfide in waters of southern James Bay. Poster No. A42A6, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
5. Davis, J. L. and R. E. Pelletier, Ground penetrating radar utility for peat analysis in the Hudson Bay lowlands. Poster No. A42A-9, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
6. denHartog, G., H. H. Neumann, A. Chipanshi, and K. M. King, Carbon dioxide flux and energy budget measurements using micrometeorological techniques at the Kinosheo Lakes tower site during the Northern Wetlands Experiment. Poster No. A42A-12, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
7. Desjardins, R. L., H. Hayhoe, P. H. Schuepp, and J. I. MacPherson, Spatial and temporal variability of CO₂, sensible and latent heat fluxes over Hudson Bay lowlands. Paper No. A51B-10, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
8. Edwards, G., H. H. Neumann, G. denHartog, G. Thurtell, and G. E. Kidd, Eddy correlation measurements of methane fluxes using a tunable diode laser at the Kinosheo Lake tower site during the Northern Wetlands Experiment. Paper No. A51B-7, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
9. Glooschenko, W. A., L. Barrie, N. Roulet, and H. Schiff, The Northern Wetlands Study: An overview. Paper No. A51B-1, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
10. Hamilton, J. D., C. A. Kelly, and J. W. M. Rudd, Methane and carbon dioxide flux from ponds and lakes of the Hudson Bay lowland. Paper No. A51B-3, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.

11. Hines, M. E., W. Z. deMello and S. E. Bayley, DMS emissions from sphagnum-dominated wetlands. Poster No. A42A-7, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
12. Jobson, T., H. Niki, and L. Barrie, Measurements of light nonmethane hydrocarbons at Fraserdale, Ontario. Paper No. A51B-12, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
13. King, G. M., P. Roslev, and A. P. Adamsen, Controls of methane oxidation in a Canadian wetland and forest soils. Poster No. A42A-13, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
14. King, K. M., A. Chipanshi, G. denHartog, H. H. Neumann, C. Kelly, D. Hamilton, J. Rudd, I. MacPherson, R. L. Desjardins, P. H. Schuepp, and G. J. Whiting, CO₂ exchange between a northern wetland and the atmosphere by surface, tower, and aircraft-based measurements. Paper No. A51B-9, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
15. Kniaz, J., G. J. Whiting, T. Moore, and N. Roulet, Seasonal measurements of NO₂ exchange in communities of the Hudson Bay lowlands. Paper No. A41A-8, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
16. MacPherson, J. J., H. H. Neumann, G. denHartog, R. L. Desjardines, K. M. King, and P. H. Schuepp, Comparison of aircraft and tower measured fluxes from the Northern Wetlands Study. Paper No. A51B-8, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
17. Moore, T. R., A. Heyes, S. Holland, W. R. Rouse, N. T. Roulet, and L. Klinger, Spatial and temporal variations of methane emissions in the Hudson Bay lowlands. Paper No. A51B-4, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
18. Mortsch, L., An assessment of the climate of 1990 during the CIRAC/ABLE-3B Northern Wetlands Study. Paper No. A51B-2, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
19. Pelletier, R. E., Landcover classification of the Schefferville area from Thematic Mapper data. Poster No. A42A-8, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
20. Roulet, N. T., the Northern Wetlands Study (NOWES) Science Team, and NASA ABLE-3B/NASA BREW, GTE Project Office, The role of the Hudson Bay lowland as a source of atmospheric methane. Paper No. A51B-5, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.

21. Schiff, H. I., D. R. Karecki, F. J. Lübkin, R. Eng, and G. I. Mackay, A tunable diode laser system for CH₄ flux measurements from a small aircraft. Poster No. A42A-1, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
22. Schiller, C. L., D. R. Hastie, N. Roulet, and L. A. Barrie, Emissions of nitrous oxide and nitric oxide from the Hudson Bay lowlands. Poster No. A42A-10, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
23. Valentine, D. W., E. A. Holland, and D. S. Schimel, Response of CH₄ and CO₂ production to manipulation of substrate and temperature in contrasting Hudson Bay lowland peat slurries. Poster No. A42A-11, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.
24. Zimmerman, P. R., J. P. Greenberg, L. F. Klinger, L. E. Heidt, and A. B. Guenther, Biogenic non-methane hydrocarbon emissions in the Hudson Bay lowlands. Paper No. A51B-11, 1991 AGU Spring Meeting, Baltimore, MD, May 1991.

2. *Applying Modeling Results in Designing a Global Tropospheric Experiment*, in Proceedings of a Working Group meeting held in Virginia Beach, VA, 15-16 July 1981, NASA CP-2235, 1982.
3. *Tropospheric Passive Remote Sensing*, in Proceedings of a workshop held in Virginia Beach VA, 20-23 July 1981, Edited by Lloyd S. Keafer, Jr., NASA CP-2237, 1982.
4. *Assessment of Techniques for Measuring Tropospheric N_xO_y* , in Proceedings of a workshop held in Palo Alto, CA, 16-20 August 1982, NASA CP-2292, 1983.
5. *Assessment of Techniques for Measuring Tropospheric H_xO_y* , in Proceedings of a workshop held in Palo Alto, CA, 16-20 August 1982, ed. James M. Hoell, Jr., NASA CP- 2332, 1984.
6. *Research Needs in Heterogeneous Tropospheric Chemistry*, in Proceedings of a workshop held in Sarasota, FL, 9-13 January 1984, NASA CP-2320, 1984.
7. *Future Directions for H_xO_y Detection*, in Proceedings of a workshop held in Menlo Park, CA, 12-15 August 1985, NASA CP-2448, December 1986, ed. David A. Crosley and James M. Hoell.
8. *Space Opportunities for Tropospheric Chemistry Research*, in Proceedings of a workshop held in New York City, 9-13 September 1985, NASA CP-2450, February 1987, ed. Joel S. Levine.
9. Crosley, D. R., *The 1993 NASA Blue Ribbon NO_y Panel*. SRI International Report MP 93-185, November 1993.
10. *Local Measurement of Tropospheric HO_x* , Summary of a workshop held at SRI International, Menlo Park, CA, 23-26 March 1992, NASA CP 3245, February 1994.
11. Crosley, D. R., *Issues in the measurement of reactive nitrogen compounds in the atmosphere*. SRI International Report MP 94-035, March 1994.
12. Crosley, D. R., *Instrumentation Development for the Global Tropospheric Experiment*, Report of a workshop held at SRI International 15-17 July 1996, SRI International Report MP 96-112, August 1996.

Revision History

Revision	Date	Comments
Original	April 1994	Initial issue
A	December 20, 1996	Preliminary update for PI review
B	February 28, 1997	Incorporates PI updates, library searches, Introductory Comments, inclusion of all authors, and general revision for citation consistency.
C	December 5, 2001	Incorporates PI updates, library searches, inclusion of all authors, and general revision for citation consistency.
